

Geography at St. Monica's

	Year 7	Year 8	Year 9	Year 10	Year 11
Autumn 1	Introduction Into Geography What knowledge & skills do you have? Development Why is global development uneven and is it fair?	Population What's happening to our population and what are the benefits and problems migration can bring?	Urban Patterns & Processes To what extent does globalization shape our cities?	Weather Hazards & Climate Change How do our weather systems work and why has climate changed over time?	Fieldwork Investigation How are rural settlements in the UK changing?
Autumn 2	Plate Tectonics How do natural disasters of earthquakes, volcanoes and tsunamis occur and what can we do to minimize their impacts?	Ecosystems How do the earth's major biomes compare?	Urban Patterns & Processes What challenges do emerging nations face as they urbanise?	Weather Hazards & Climate Change What causes tropical cyclones and droughts and how do we respond to them?	River Landscapes and Processes What natural forces interact to create our river environments?
Spring 1	Weather & Climate What is the difference and how do they work?	Coasts How are coastal landforms created and how and why do we manage our coastlines?	Global Development What are the causes and consequences of uneven development?	The Changing Landscape of The UK What physical and human processes make our landscape distinctive?	River Landscapes and Processes How does human activity interfere with the natural forces of rivers and what advantages and disadvantages does this produce?
Spring 2	Water Security Why is our most precious resource causing concern for global governments?	Geography of Crime Why should we act in as a global steward and how can we design out crime in our world?	Global Development What strategies are being used to address inequality? How successful are they proving to be?	Coastal Landscapes and Processes How do physical processes shape our coastline?	Ecosystems, Biodiversity and Management What is the distribution of global biomes? What are the distinctive features of The Tropical Rainforest and why is it under threat?
Summer 1	Rivers & Flooding How are landforms created, why is flooding increasing and how can we protect ourselves?	Global Sustainability Are we managing our world now and for future generations?	Resource Management How do we use and distribute earth's natural resources?	Coastal Landscapes and Processes How does human activity influence our coastal environments?	Ecosystems, Biodiversity and Management What are the characteristics of Deciduous Forest and how can we sustainably manage them?
Summer 2	Tourism Why has tourism become a global industry and is the future bright?	Urban & Rural Processes Why are our built environments evolving in certain ways?	Resource Management How can we address the increasing concern of global water shortages?	Fieldwork Investigation How do coastal processes shape our coastlines?	GCSE Exams
